## Enterprise Digital Assistant (EDA)

For demanding healthcare applications such as bedside point-of-care, specimen collection and inventory management, Honeywell's Dolphin® 7800hc rugged enterprise digital assistant (EDA) delivers multi-purpose computing, communication, and data collection at desktop-like speed, driving increased productivity and patient safety.

Healthcare professionals need compact, lightweight devices that are designed for durability and usability. The easy-to-use Dolphin 7800hc enables single-handed operation, allowing healthcare professionals to multi-task seamlessly. Additionally, its compact design fits easily in most pockets without weighing down users. Excellent at resisting the harmful effects of harsh cleaning agents used commonly in healthcare environments, the Dolphin 7800hc is equipped with disinfectant-ready housings that deliver long-term reliability and lower repair costs when compared to devices made from traditional materials.

A large, high resolution screen maximizes productivity and ensures easy viewing of critical patient data. Adaptus® Imaging Technology 6.0 enables omnidirectional, point-and-shoot scanning of linear and 2D bar codes, while an optionally integrated color camera enables seamless image and video capture.

When an oversized industrial-grade mobile computer provides more than what is needed, Honeywell's purpose-built Dolphin 7800hc rugged EDA provides a reliable, affordably-priced alternative that offers versatile data collection and real-time communication for healthcare professionals in a compact and lightweight design.
